SFY2010 Tire-derived Products Grant

This grant will be awarded to “local units of government” and applications will be evaluated by the GRANT COMMITTEE according to these CRITERIA: First time applicants; **products containing Kansas waste tires**; applications containing ‘cash’ match; playground surface materials application and design that meet ADA recommendations; an education and outreach component.

List of Approved **Products** (alphabetical by company)

CAT1 KplaySafe (Playground Crumb rubber)

**MADE from
Kansas
waste tires
in Kansas**

Made by Catsco/Tire Recovery

Catsco received a BWM FY09 tire processing equipment grant to purchase and install the equipment needed to further process crumb rubber into a smaller product for playground surfacing. This production should be up and running and packaging product in time for the current grant round. This is the first facility here in Kansas installing the capability to further process and package loose fill playground mulch product. Grant applicants who apply for this product and for some reason are not able to purchase this product when the time comes will be allowed to reallocate their grant money to another selection on the approved list.
